PERFORMA

PERFORMA

PERFORMA is a SUSTAINABLE line because it comes from GMO-free corn intended for industrial use and is completely solvent-free.

It combines research, environment protection and performance. It's extremely soft, breathable and water-proof.

PERFORMA is a range of products for the clothing, footwear (in particular technical sports footwear) and accessory industries.

With equal thickness, PERFORMA weighs 30% less than natural leather. It's easy to process because it can be washed in the washing machine or autoclave. Moreover, it can be personalised with high-resolution digital prints.

It has been awarded the EU ECOLABEL, the European label that certifies (according to Regulation (EC) No 66/2010) the low environmental impact of products or services.

COMFORT

Increased lightness:
-30% of weight

DURATION

Increased resistance
against abrasions

SAFETY

Resistance to strong
acids and bases

SUSTAINABILITY

Use of plant-based
raw materials

CHARACTERISTICS

The PERFORMA range is made with high-tenacity microfibre coated with highly resistant polyurethane resins and is produced with the island-sea system. 65% of the products used to finish the microfibre come from non-GMO raw materials.

PERFORMA is treated with Ultra Fresh additive to protect against mould and bad odours resulting from bacteria.

*Ultra-Fresh is a registered trademark of Thomson Research Associates Inc.

SEA-ISLAND TECHNOLOGY

When two polymers are co-extruded to create one fibre, the dispersion in the fibre's transversal section is called "island" and the matrix, "sea". When the "sea" component is eliminated through specific processes, you can obtain a group of fine microfibres. The structure of the resulting fibre resembles a set of islands in the middle of the sea.

The fabric made with this fibre features a unique style and superior comfort, excellent breathability and waterproofness, and strong decontamination properties.
