

# LAI-Porellina<sup>®</sup>

traspirante - assorbente - antibatterica

## LAI-Porellina®

Lai-Porellina is an environmentally-friendly lining manufactured by Fiscatech. It stands out for its breathable, absorbing and antibacterial properties. It's permeable, as it allows water vapour to pass through it. Its soft and embracing touch provides extreme comfort. It's treated with Ultra Fresh additive to protect against mould and bad odours resulting from bacteria.

LAI-Porellina is an Italian product certified by the American Podiatric Medical Association (APMA).

\*Ultra-Fresh is a registered trademark of Thomson Research Associates Inc.

## TECHNICAL CHARACTERISTICS

Thanks to its vertical production process, all Fiscatech processing stages are guaranteed by the Quality System, which has the following certifications:

**Iso En 9001:2015**

**Iso En 14001:2015**

**Ohsa 18001:2007**

	Water vapour Breathability	Technical features
HIGHEST	> 400 g/m <sup>2</sup> .24h	450 g/m <sup>2</sup> .24h <sup>2</sup>
HIGH	from 200 to 400 g/m <sup>2</sup> .24h	
MEDIUM	from 100 to 200 g/m <sup>2</sup> .24h	
LOW	<100 g/m <sup>2</sup> .24h	

# LAI-Porellina® is:

## LIGHT

Unlike other linings, Lai-Porellina weighs only 200 g/sq.m, meaning 19 g per square foot.

## HYGIENIC

It's processed with anti-bacterial products to protect feet.

## THIN

Its thickness (0.7 mm) helps improve the aesthetics of the sharp cut along the edge of the décolletage.

## SOFT

Its coagulated substrate is designed to wrap the foot like a glove thus providing the utmost comfort. Despite its reduced thickness, it's pleasant to the touch thanks to its soft and embracing feel. The finishing is natural. It's self-modelling. An essential feature that ensures quality.

## FRESH

The fibre/resin ratio, which in regular linens is equal to 1:4, has been reduced to 1:1. By reducing the content of resin (which is insulating and more fibrous), we improved the exchange of internal-external heat. This way we can ensure an improved sensation of freshness for the foot.

## BREATHABLE AND ABSORBING

The raw materials and processing methods used helped us obtain a highly poromeric, absorbing and breathable material. The water vapour that results from sweating is conveyed outside. That's why, Lai-Porellina provides exceptional comfort and freshness.
